Powell Software

TECHNICAL KEY FEATURES

Security

Security is an important topic for us. We do not require a service account with password, everything is always executed with the connected user rights (managed by you in Office 365)

Data Localization

Our databases are located in the Azure Amsterdam Data

Reversibility

Powell Teams has no footprint in your Office 365 environment. You can install, test, use, and uninstall the solution without any impact on your content & structure. You will keep all your existing team, posts & content.

Data storage

Powell Teams stores the minimum amount of data and **does not** store information about your content. We store:

- Team template settings (including tags, naming convention rules, default member/owner ID...)
- Powell Teams administrator email to validate the connection
- Office 365 Tenant ID for license management
